9" to 12"
TALL PROFILE

The newest model in our lineup, recommended for heavy snow conditions. The VentSaver EZ Series is made from non-corrosive aluminum and stainless steel aircraft cable. Also provided are stainless steel nuts, bolts and heavy duty 1 1/2" lag screws. The EZ Series will fit any roof pitch and an infinite array of pipe sizes from 1" to 14" across. The vertical fin has a 12" standing profile that is designed to protect roof stacks, chimneys, gas vents and masts. The beauty of the EZ Series is the variety of applications that it will accommodate with its optional accessories. This product allows for easy installation with simple hand tools.

Additional Information: Designed to fit vents, chimneys or stack pipes that measure 1" to 14" across. Protects a standing profile of approximately 12". An optional snow diverter wing kit and height extension kit can be used along with either of the 12-24 VentSaver Plate Kits.
